### **DETAILED ACTION**

Claims 41-52,62-132,137-172,177 have been cancelled.

Claims 1,23,178-180,182 have been amended. Claims 183-186 have been added as new claims.

The addition of claims 183-186 necessitates an election of a further species. It is noted that 37 CFR 1.142 states that a requirement for restriction can be made at any time before final action.

#### ***Election/Restrictions***

Previously, applicant elected group I (Claims 1-40,47-49,53-61,133-136) (11/5/04) and elected a species comprising amino acid sequence LKKTET (2/24/05) for the wound healing polypeptide. As stated in the office action (4/17/08) claims 178-182 are drawn to an invention that is independent of distinct from the invention originally claimed.

As such group I corresponds to instant claims 1-40,53-61,133-136,173-177,183-186.

Applicant previously elected for the wound healing polypeptide a species comprising amino acid sequence LKKTET. Applicant should clarify if newly added claims 183-184 read on the elected species of wound healing polypeptide.

In addition to the wound healing polypeptide, this application also contains claims directed to the following patentably distinct species:

Art Unit: 1654

**1) Patient population:** applicant should elect a specific unique species of patient population from those recited in claims 185-186. For example, applicant can identify those with a skin wound as a species.

**2) Further agent:** applicant should elect a specific unique species of further agent, if any, from those recited in claims 3,11,14,29, for example. For example, applicant can identify transforming growth factor beta as a species.

**3) Further excipient:** applicant should elect a specific unique species of excipient, if any, from those recited in claim 136, for example. For example, applicant can identify sterile water as a species.

The species are independent or distinct because claims to the different species recite the mutually exclusive characteristics of such species. In addition, these species are not obvious variants of each other based on the current record.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, all claims are generic to at least one of the species.

There is an examination and search burden for these patentably distinct species due to their mutually exclusive characteristics. The species require a different field of search (e.g., searching different classes/subclasses or electronic resources, or employing different search queries); and/or the prior art applicable to one species would not likely be applicable to another species; and/or the species are likely to raise different non-prior art issues under 35 U.S.C. 101 and/or 35 U.S.C. 112, first paragraph.

**Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species to be examined** even though the requirement may be traversed (37 CFR 1.143) **and (ii) identification of the claims encompassing the elected species**, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Art Unit: 1654

The election of the species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the election of species requirement, the election shall be treated as an election without traverse. Traversal must be presented at the time of election in order to be considered timely. Failure to timely traverse the requirement will result in the loss of right to petition under 37 CFR 1.144. If claims are added after the election, applicant must indicate which of these claims are readable on the elected species.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the species unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other species.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141.

Art Unit: 1654

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
